

The Key Discussions you will never want to miss

Panel Discussion I

“How does China’s aerospace industry grasp this opportunities in developing and strengthening China’s own aeronautical materials and process technology?”

- Outlook on overall aeronautical materials demand during “long-term development plan of China Civil Aviation Industry (2013-2020)”
- Tier 1 suppliers such as AVIC Xi’an , AVIC Gas Turbine, will discuss their choice on aeronautical materials
- IP protection issues with introduction of advanced technology and mechanism

Panel Discussion II

“According to ‘long-term development plan of China Civil Aviation Industry (2013-2020)’, should China rapidly increase investment in molding technologies of advanced aeronautical materials?”

- Outlook on overall advanced molding technologies demand during “long-term development plan of China Civil Aviation Industry (2013-2020)
- Investment casting technology associate with reliability and economy of aero-engine’s key components
- How far away are additive manufacturing from being used in actual production of aero-engines key components?
- Other advances molding technologies
